## Meiji Corporation Introduces Superior Oil Filtration System

### FOR IMMEDIATE RELEASE

**Elk Grove Village, IL** (May 6, 2004) – Meiji Corporation, an industry leader of factory automation components and value-added engineering, announced that it signed an agreement to become a Miracle Boy brand distributor of ultra-fine oil filtration systems. Miracle Boy, headquartered in Fuji City, Japan, was founded with the ideals of providing a means for customers around the world to reduce their carbon footprint and oil expenditures while extending their machine life throughout the plant. This filtration system is used in various industries, pulp and paper mills, petrochemical plants, nuclear power, coal-fired plants, automotive assembly plants, and shipbuilding ports around the world.
